
Introduction

As a budding full-stack developer with a keen interest in both front-end and back-end technologies, I have gained hands-on experience through various group and personal projects. My technical skill set encompasses React JS, React Native, JavaScript, Node.js, and Java, enabling me to tackle challenges across the full spectrum of web and mobile application development. Complementing my development skills is my 7 years of expertise in IT security management, providing a solid foundation for crafting secure, efficient solutions. This combination of development acumen and security awareness uniquely positions me to contribute to projects that require a comprehensive, security-conscious approach to full-stack development.

EDUCATION
